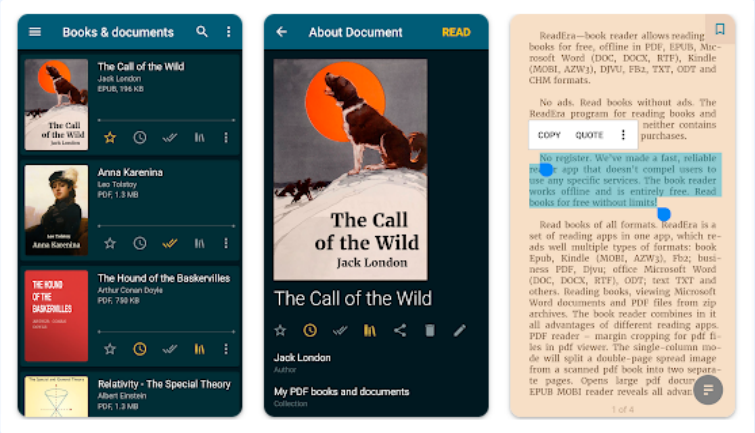
E-Book Reader Functionality

Description

Allow user to read the book summary through a user-friendly e-book reader interface that enhances the reading experience by displaying the current page, enabling quick navigation to specific pages, resuming from the last-read position, and maintaining a reading history for all previous books.

Our entire app purpose is to allow users to easily read their uploaded book. You can refer to any example Ebook reader in the store for reference.

Example: ReadEra – book reader pdf epub - Apps on Google Play



Acceptance Criteria

- Description
- Acceptance Criteria
  - Sub-Feature 1: Display Current Page
  - Sub-Feature 2: Jump to Specific Page
  - Sub-Feature 3: Resume From Last-Read Position
  - Sub-Feature 4: Reading History and Continuation
  - Sub-Feature 5: Display Customization (Night Mode)

Sub-Feature 1: Display Current Page

Display Current Page Number:

- **GIVEN** the user is reading a book summary.
- **WHEN** the current page is displayed.
- **THEN** the system shows the page number (e.g., "Page 5 of 20") in a non-intrusive manner (e.g., bottom or top corner).

Update Page Number:

- **GIVEN** the user navigates to another page (swipe left/right).
- **WHEN** the page changes.
- **THEN** the displayed page number updates dynamically.

Sub-Feature 2: Jump to Specific Page

Quick Page Navigation:

- **GIVEN** the user is reading a book summary.
- **WHEN** the user opens a "Go to Page" dialog or input box.
- **THEN** the system allows the user to enter a page number within the valid range.

Validate Page Number:

- **GIVEN** the user enters a page number outside the valid range.
- **WHEN** the input is submitted.
- **THEN** the system displays a message:
  "Oops! Please enter a page number between 1 and [total pages]."

Jump to Page:

- **GIVEN** the user enters a valid page number.
- **WHEN** the input is submitted.
- **THEN** the system navigates to the specified page

Sub-Feature 3: Resume From Last-Read Position

Save Last-Read Page:

- **GIVEN** the user is reading a book summary.
- **WHEN** the app is closed or the user exits the book summary.
- **THEN** the system saves the user's current page as the last-read position.

Resume Automatically:

- **GIVEN** the user reopens the app and selects a previously read book summary.
- **WHEN** the book summary is loaded.
- **THEN** the system navigates directly to the last-read page.

Sub-Feature 4: Reading History and Continuation

View Reading History:

- **GIVEN** the user accesses the e-book reader home screen.
- **WHEN** the user views their reading history.
- **THEN** the system displays a list of previously read book summaries, including:
  - File name or title
  - Last-read page number (e.g., "Page 5 of 20")
  - Date last accessed

Continue Reading:

- **GIVEN** the user selects a book summary from their reading history.
- **WHEN** the summary is opened.

- **THEN** the system navigates to the last-read page automatically

Sub-Feature 5: Display Customization (Night Mode)

Description:
Provide users with the ability to customize their reading experience by enabling night mode.

- **Enable Night Mode:**
  - **GIVEN** the user is reading a book summary.
  - **WHEN** the user accesses the display settings and selects "Night Mode."
  - **THEN** the system switches to a dark background with light text.
- **Disable Night Mode:**
  - **GIVEN** the user is reading in night mode.
  - **WHEN** the user accesses the display settings and deselects "Night Mode."
  - **THEN** the system switches back to the default light background with dark text.
- **Persistent Setting:**
  - **GIVEN** the user selects night mode.
  - **WHEN** the app is closed and reopened.
  - **THEN** the system remembers the night mode setting and applies it automatically.
